

Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: March 26, 2008

Water Body Under Evaluation:

Water Body ID #: 0176
Name: Paris Branch (Class C)
Length of Segment: 3.0 miles
County(ies): Lincoln

Use Attainability Analysis (UAA) Study:

UAA ID #: 1174
Submitter: MEC Water Resources, Inc.
Date(s) Conducted: May 14, 2007
Date Received: June 5, 2007
Use Evaluated: Whole Body Contact recreation (WBCR)
Secondary Contact Recreation (SCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
- ☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown

Comments: The UAA survey was conducted in May 2007 and no WBCR was observed. No interviews were conducted during the survey. On March 26, 2008 an e-mail from the Missouri Department of Conservation (MDC) confirmed its 2005 comments that children were observed playing/splashing in the stream after Nov. 28, 1975.

Is the evaluated use attainable? ☐ Yes ☒ No

Comments: The stream did not meet the depth criteria at any of the 3 sites evaluated. As a result, data in this UAA supports the 2005 Water Quality Standards where the WBCR use was not assigned. However, due to the public comments received from MDC in 2005, Secondary Contact Recreation is recommended to be assigned.

Committee Recommendation:

- ☐ Add Use
- ☐ Retain Use
- ☒ Remove Use
- ☐ Modify Use
- ☐ Inconclusive
